Electrotechnicien

Ma recherche

Je recherche tout type de contrat, sur toute la région Midi Pyrénées, dans l'Electricité et maintenance, l'Administration et Juridique.

Formations

1990: Bachelor AC F3 in Electro mechanics. Les Montôts Nevers.
1987: BEP Electro mechanics. Les Montôts Nevers.

Expériences professionnelles

From April 2012 To November 2014

DIESTMANN France: Training instructor in instrumentation and electricity for Congo and Gabon. Exclusive trainer in oil process for France Training in training center to Pointe Noire and Port Gentil Creation of training material Site audit, platform and FPSO audit for Dietsmann staff. Prepare and provides training in instrumentation about signal, measurement, PID reading, loop diagram, flowmeters, levels, pressures, vibrations, automatism and basis of maintenance Prepare and provides training in electricity about distribution and creation of energy, fundamental laws, asynchronous motors, DC engines, transformers, batteries, variators and protections. For training, theoretical part in room and practical part as possible in workshops. I followed specific training for CLOV project in process and service. I followed IFP training about metering and allocation.

From November 2010 to October 2011

MAN Germany to October 2011 Startup Engineer on PEI Port Ouest La Réunion French territory: Writing and planning of Start-up procedures for ancillaries' systems such as motors, actuators, heavy fuels conditioning, equipment's, centrifuges, lubrication oils reconditioning, Urea injections, in exhaust gases. Verification's and coordination of procedures writing between the various suppliers and the final client. Writing of the 12 x 20 MWatts engines and ancillary equipment's running parameters. Exploitations of information's and vendor document's to create synthesized, easy to use spread sheets for Operators and Maintenance personnel. (motors, pumps, fans and blowers, compressors, instruments, centrifuge separators, filters. Writing with QA/QC department of the preventive Maintenance plans for the different trades. Writing of the electrical isolation procedures for the transformers HV/MV/LV, electrical supply boards, MCC's.

From March 2009 to October 2010

FORMAELEC Co. France: to October 2010 Training Instructor on HV/MV/LV equipment's. Use of different manufacturer's cells such as Merlin Gerin, ABB, Alstom, Aréva, Schneider and more. From the oldest models with cut off in the air to the most modern with cut off under vacuum and the SF6 type model. Main clients in the south west of France were: Tisséo, Airbus, ASF, Aéroport de Toulouse Blagnac. Preparation of training courses for equipment's trouble shooting, drawing reading, fine tuning of Siemens PLC's, Legrand, Schneider, Allen Bradley. Training of personnel on variable speed controller's.

From September 2008 to February 2009

ICE co. France: February 2009 Precommissioning and Start Up Technician on overseas operations for a potable water treatment company. Work sites in Poland, Dubaï, Greece, and Vietnam. Verification of plant construction and installation by local manpower of rotating equipment's, motorized valves, filters, UV, Reverse Osmosis and instruments. Calibrations and tuning of instruments, plant start up with an automation/PLC specialist and a Chemical Engineer.

From January 2008 to June 2008

WESTFALIA SEPARATOR Co. June 2008: Start Up Technician. Start Up of the Electrical power production plant in Kounoune in Senegal and of Ouagadougou in Burkina Faso. Start Up of fuel conditioning, lube oil purification and oily waters treatment. Verification of works done by local teams, installation of the rotating equipment's such as centrifugal separators, centrifuges controls and Instrument. Start up and fine tuning of equipment to validate, the warranties and training of Operation and Maintenance personnel. From August 1992 to December 2007: ALFA LAVAL SAS December 2007 After sales Technician. Maintenance and renovation of various models of centrifuge separators used in different industries such as Agro food, petrochemicals, and sewerage water treatment etc. Following "in house" training, I switched over to the Precom., Commissioning, and start Up of sophisticated units for the treatment of products and by products effluents in the chemistry industries, then on fuel treatment and conditioning, oils and lubricants. Spécialist in treatment of hydrocarbon fuels for EDF (Electricité De France). SONELEC, SENELEC, interventions on petro chemical processes (SAIPOL, ATOCHEM GRAND PAROISSE, RHONE POULENC, CHEVRON CHEMICAL). Startup of various units in West African countries. Control of the installation procedures follow up by local teams during the construction and plant building. Certification of startup procedures to obtain warranties. Training of client's personnel working in Operation and Maintenance departments.
